+917355828310

Driven frontend engineer with over 8+ years of experience, now venturing into fullstack development. Built websites, widgets, and Progressive Web Apps for a wide user base. Ready to contribute to the entire software development process with a hands-on approach. I enjoy connecting the dots between front-end and back-end to create seamless and innovative solutions.

Willing to relocate: Anywhere

## Work Experience

### Module Lead

Celsior Technologies-Noida, Uttar Pradesh

Contractual / Temporary

February 2025 to August 2025 • Contractual / Temporary

At Celsior, served as the sole developer for a Progressive Web App project for Comporium, a leading U.S.-based telecommunications company offering internet, digital TV, phone, and security services.

Designed, developed, and deployed the customer-facing app, enabling users to monitor internet usage, view billing information, and submit support requests. Successfully assisted with deployment to both the App Store and Google Play Store.

### Frontend Consultant

BayRock Labs-Hyderabad, Telangana

Full-time

March 2024 to September 2024 • Full-time

Worked with Crosshatch, a Miami-based startup providing businesses with a customizable widget to obtain visitor consent for tailored user experiences by collecting preferred information directly from website users.

• Developed a custom component library for Crosshatch.io, utilizing cutting-edge libraries such as ParkUI, Ark.js, and Panda-CSS, tailored specifically to meet the startup's needs and built from scratch.

• Led frontend development for the application, leveraging the custom component library to create a cohesive and efficient user interface experience.

### Senior Software Engineer

Trantor Software Pvt. Ltd-Chandigarh, Chandigarh

Full-time

November 2021 to March 2024 • Full-time

Project #1: lido.app

I contributed to a New York-based startup working on a unique spreadsheet application. This application allowed users to seamlessly import data from various sources including databases, Google Analytics, Salesforce, and more.

Responsibilities:

• Develop new UI components and maintained existing ones proficiently.

• Resolve existing bugs promptly and efficiently

• Designing the architecture and developing the application using HTML5, CSS3, ReactJS, NextJS, GraphQL

• CR/Functionality development life cycle involving development, documentation, testing and maintenance

• Attended weekly town hall meetings, presented demos, and addressed project blockers.

• Deliver bug-free and testable frontend components

• Provide detailed review on PRs and code base for enhancing code quality

• Worked with different teams to make sure our UI components fit in smoothly.

Technologies used: HTML5, CSS3, ReactJS, NextJS, GraphQL, TypeScript

Project #2: Looper

Looper served as an internal tool at VMware, akin to Atlassian's Jira. This web-based application empowered the sales team to generate "feedback" related to different products.

Responsibilities:
• Upgrade the packages and incrementally update the code base to use latest React and other dependencies

• Build app and UI components from wireframes

• Improve front-end performance by eliminating performance bottlenecks

• Fix existing bugs

• Introduce new features

• Mentor the Junior developers

• Used Redux for state management and React Testing Library for testing

Technologies Used: React, Redux, React Testing Library, TypeScript

## Front End Web Developer
ResponseIQ-Mohali, Punjab
Full-time
July 2019 to October 2021 • Full-time

ResponseiQ is the intelligent callback platform that helps businesses increase inbound calls and conversions.

Responsibilities:
• Built component library in reactjs and deployed to npm

• Maintained UI of legacy call back widget

• Removed jQuery dependency from the codebase of legacy callback widget that resulted in 60% lesser bundle size and better web vitals

• Ensured accessibility of callback widget

• Maintained UI of dashboard

• Created marketing website from scratch and deployed

• Created brand new call back widget in reactjs

• Imported some modules of dashboard in lit-element

• Cooperated with back-end team in process of creating restful apis

• Designed and maintained MJML email templates

• Collaborated with designers to ensure designs were technically sound

Technologies Used: ReactJS, jQuery, lit-element, MJML, JavaScript, lit-html, web-components

**Web Designer**

Oditi Global Solutions Pvt. Ltd.-Mohali, Punjab
Full-time
January 2017 to June 2019 • Full-time

Oditi Global Solutions is a digital marketing agency that helps businesses with search engine optimization, social media marketing and email marketing.

Responsibilities:
• Maintained marketing website
• Created modular, responsive templates using SCSS, nunjucks, JavaScript and gulpjs
• Maintained dashboard UI of various clients
• Created Mock ups/Banners/Business Cards/Logos for various clients
• Created, Deployed and maintained various WordPress websites from scratch
• Worked closely with back-end team to meet the client's requirements

Technologies Used: HTML, CSS, SCSS, Nunjucks, JavaScript, GulpJS, WordPress

## Education
